

## Assignment Details

During your first 5 weeks of clinical, you have probably had patients with vaginal complaints and possible infections. For this Assignment, you will choose three STIs (e.g., bacterial vaginosis, HPV, chlamydia, HIV, trichomoniasis). Then fill in the chart for all columns including presenting symptoms, physical findings, laboratory/diagnostic findings, and management or treatment. Do not leave any section blank.

When complete, upload your chart to the Dropbox.

Infection	Patient presenting symptoms	Physical findings on exam	Laboratory or diagnostic exams	Management /treatment	Patient counseling /teaching	Referrals (if any)	Other pertinent information
