### Section 2: Synthesis: Impact on Food Systems

In this second section, students will assess how the information discussed and how the selected global destination relates to and will impact the food system.

#### Outcome requirement for Section 2 (Due by week 9):

Section 2 should be no longer than 10 pages and no less than 5 pages, on 8 ½ by 11 sheets, typed, double-spaced, with 12 point font will contain a research essay, written in a clear concise format, analyzing the information that was obtained from Section 1, concerning the selected global destination and the influences that affect the food system found there. Students should be able to identify the underlying factors that impact on domestic food system, and food systems globally.

For the purpose of the assurance of learning, three (3) scores will be administered for Section 2. The criteria for these scores are the student's ability to:

- a. Integrate theories and concepts in decision making: Students are able to transform and integrate theories and concepts into a destination food system plan that informs managerial decisions in the context of tourist behavior (HOSP LO2A);
- b. Integrate results using an enterprise-wide perspective: Students are able to transform and integrate information relevant to the implementation of an destination-wide food system plan appropriate to the destination environment (HOSP LO2B); and
- c. Integrate multiple viewpoints in making decisions across business functions: Students are able to integrate alternative or competing perspectives pertaining to food and the food system, including
