PSY699: Master of Arts in Psychology Capstone
Poster Submission Guidelines

Congratulations on your poster being accepted for the Week Five Virtual Poster Conference! The Virtual Conference will provide you with an opportunity to share your work with your colleagues in a professional poster presentation. Your poster and explanation of the materials presented therein must be uploadedto your Pathbrite portfolio page no later than Day 3 of Week Five so that you may post the link to these in the initial post for this discussion.

Poster Guidelines

1. All information on the poster must be compiled into one PowerPoint slide in Landscape Orientation. See the template options here: Template 1, Template 2, and Template 3.
2. The full title of the poster and the name of the author should be shown at the top of the slide.
3. Enter content for the poster within the appropriate sections of your template and add heading names as necessary.
4. Be sure to remove any unused sections of the template.
5. Any photographs, graphs, or other images must belong to the author or be his/her original creation and should be large enough to see relevant detail.

Formatting Tips

1. Be clear and concise with the poster design and content. Overcrowding a poster makes it difficult to read.
2. When creating the PowerPoint electronic poster, the preferred font is a 20-point font size. Use a minimum 16-point font size for ease of reading.
3. If possible, do not reformat the template, as the requirements for visibility are already built into the models.
