

Week 3 - Assignment: Determine Project Framework

Instructions

This week, you examined the use of theoretical and conceptual frameworks when conducting a scholarly project. Frameworks can be fairly straightforward, or they can be complex. This week, you may have figured out that, while applied or action research usually utilizes conceptual frameworks or models, there can also be theoretical underpinnings as well.

For this assignment, you will keep working with your proposed project topic and determine the theoretical and conceptual frameworks that could be utilized to ground your project. You will produce a PowerPoint presentation that identifies your topic, at least one possible theoretical framework, at least one possible conceptual framework, and your rationale for each. Your concluding slide should indicate which framework(s) you would ultimately choose or if you believe both types should be included and why.

Length: Minimum of 5 slides, not including title and reference slides

References: Include a minimum of 5 scholarly and/or professional references

Your presentation should demonstrate thoughtful consideration of the ideas and concepts that are presented in the course and provide new thoughts and insights relating directly to this topic. Your response should reflect graduate-level writing and APA standards.
