**Create** a 10- to 12-slide Microsoft® PowerPoint® presentation, with speaker notes, on the topic of science and the detective.

Include the following in your presentation:

- Describe the toxicology of drugs.
- Identify the role of the forensic pathologist, forensic entomologist, forensic toxicologist, and forensic anthropologist.
- Identify the investigative procedures involving computer forensics.
- Explain how each of these roles can work collectively to solve crimes.

**Cite** the references used and include in text citations to support each of your responses.

**Submit** your assignment.
