## **Professional Development Plan (PDP)**

**Throughout the MSHR Program, students have been engaged in a number of self-evaluations and career exploration exercises to ideally determine what direction or path that they would like their careers to take in the future.**

**For this assignment, students will be asked to construct a Professional Development Plan that addresses the following elements:**

- 1. An overall career goal.**
- 2. Research on the knowledge, skills and abilities needed for the position identified in #1. This should include: competencies, years of required experience (approximate), education as well as any other common requirements or preferences, such as certifications.**
- 3. A gap analysis based on your research from #2. In other words, what KSA's, education/certifications and/or other requirements/preferences would you not meet today?**
- 4. An action plan to address any of the identified gaps from #3.**

**This should be in a paper format and should include all resource material used, particularly for #2.**

**\*\*This project is due on Day 1 of Week 6**
