Demonstrate the following UFS graduate attributes: critical thinking and ethical reasoning.

**Assignment 1:**  
Situational demands /  
External and internal  
contextual tendencies  
influencing education  
systems.

**Religion**, a  
controversial subject,  
is one of the external  
determinators that  
can influence the  
education system.

The purpose of this  
assignment is to  
determine how  
religion as an external  
determinant  
influences the  
education systems of  
South Africa and two  
other developing  
countries. (You can  
select two other  
African countries).

In the assignment you  
**should explore**  
**religion as an**  
**external**  
**determinant**  
**influences the**  
**education systems**  
of South Africa and  
two other developing  
countries.

**Critically discuss**  
**the differences and**  
**similarities** that can  
be identified on the  
basis of religion as an

	<p>external determinant of the various education systems – South Africa and the two selected developing countries.</p> <p><b>Use the comparative method in Comparative and International Studies</b> to answer the question of the assignment.</p> <p><b>Discuss and evaluate best practices</b> through engaging in a literature review in order to document/report on, the influence of religion as an external determinant on the education systems of the countries (South Africa and the two selected developing countries).</p> <p><b>For the reflection:</b> Reflect on the introduction and orientation presentation (Class 1), theory of comparative education and the historically trajectory of Comparative and International studies (Chapter 1) and do a reflection on Chapter 2, education systems.</p>
