

Preparing for a Successful Transition

Choose two of the components of career readiness as described in this lesson. In a document in MS Word format (.doc or .docx), create your own version of the table provided below. You do not have to use an actual table, but be sure to align each of the elements with the specific component you are discussing. Complete the table as follows:

- For each component you have chosen, describe how you would incorporate each of the following elements:
 - **Context**—describe your setting, community, and demographics. Describe one relevant strategy to apply the component.
 - **Cultural competence**—describe your students' diversity. Describe how you would apply the component in respect to your students' diversity.
 - **Multilevel interventions**—explain how you would apply your component to each level:
 - Students
 - School
 - Families
 - Community
 - **Data**—provide one data point for each of the following in relation to your component:
 - Potential inequity, or inequities if there are more than one
 - Measurable goal
 - Method of informing practice
 - Method of accountability
- Focus on transformational strategies that are engaging to your students.

Component	Context	Cultural Competence	Multilevel Interventions	Data
