****Dialectic Notes Chart should look like this:

Evidence: Interesting facts, statistics and other information from this source that you might want to include in a paragraph in your essay. You can quote the information or put it in your own words (paraphrase)	Interpretation/Analysis: A sentence that connects each piece of information on the left to your thesis and/or topic sentence of a particular paragraph. Can begin with words like “This means that...” or “This shows that...” or “This is important because...”
A survey conducted by the Pew Research Center revealed cellphone owners between 18 and 24 years old exchange around 100 text messages on an average day.	This shows that the survey results were very high. The number of texts messages sent by people around 18 and 24 every day is very high.
Anguiano also thinks there are some situations where texting is the best option because of circumstances.	This shows that in some cases, it is okay to send messages instead of making

<p>texting is the best option because of circumstances that do not encourage a phone call.</p>	<p>cases, it is okay to send messages instead of making a phone call.</p>
<p>Some students see the benefits of interacting directly with other people, and yet, there are still hoards of students who venture the campus with their head buried in their phone.</p>	<p>This means that students walk lost on their cell phones, although some still believe that interpersonal communication is the best.</p>
<p>"It's really sad, we are paying all this money to come to school and aren't [interacting] with the people in front of us," Schoonmaker said.</p>	<p>This is important because it shows the actual situation at school is sad because doesn't exist any interaction between students.</p>
