Write a one-page response to Before the Flood (your thoughts, feelings, and opinions on climate change after watching this documentary)

**Outlines**

- The documentary increased my knowledge about the climate change.
- I believe that if we wait the political authority to issue a decisive decision, we'll lose our land before they budge. It starts from us, people whom care about this planet.
- The movie makes me reconsider my life style. Drive less – using my bicycle more and do more recycling to decrease my foot-print, try to leave no trace.
- I also, shared the documentary on my social-media accounts to enlighten my followers about the issue and encourage them to be more green for them and for the next generations.
