Accounting

This week, you were asked to access a number of videos and websites. These are great resources to help you learn the materials this week. Consider what type of resource you find most helpful in learning new materials (videos, examples, text, etc). Then consider Activity-Based Costing. Complete an online search for a new resource that will help you with this topic. For example if you learn best through videos, complete an online search for "Activity-Based Costing videos". Select one of the items you find in your search that you found particularly helpful in learning this topic and post a summary of the resource and a link to the resource.

INITIAL POST

In at least 3 paragraphs, give an observation of the topic and the resource used to better understand it.

Cite and summarize the resource(s).
