3 Year Old Girl--Ruggy

- Had witnessed the murder of her own mother, being raped, and murdered. She has her own throat cut, twice, and is left for dead. She is alone with her dead mother's body for eleven hours in her apartment. Then, she's taken to the hospital and has the wound on her neck treated. In the hospital, the physicians recommend an ongoing mental health evaluation. But after she's released, she's placed in a foster home as a ward of the state. And the details of the child's experiences are never shared with the foster family because she is in hiding. Despite the doctor's recommendation, she didn't get any mental health help.
- Now, almost a year later, the prosecution wanted her to testify about it. People are concerned that this might be pretty overwhelming for her. What would you do if you are a counselor for Ruggy?

Children and Trauma

- Attention Deficit/Hyperactivity Disorder
- Oppositional –defiant disorder
- Conduct disorder
- Depression
- Post-Traumatic Stress Disorder: anxiety, sleep problems, intrusive and disturbing “flashback” memories of event, racing heart beat,

- Clonidine—medication that help heart rate be normalized and sleep improved.
- Criminal cases—forensic interview for court hearing and criminal investigation purpose
