Assignments: Read the assigned texts for each. Answer the questions with detailed answers based off of the reading. Poor and short answers will receive no credit. Responses should show knowledge of the reading and thoroughly answer the questions. Only thoughtful, quality answers will receive credit. There is no need to do additional research; the readings should be sufficient enough. *Even if the question asks your “opinion,” it must be provided in consultation with the reading material.* Answers for each question should be no less than a good detailed paragraph, however, more is expected for a good grade.
